

Among the many monuments to General Sherman, the one situated in Calvary Cemetery, St. Louis, is a most unique, compelling design. The very character of its architecture seems to emphasize the faithful and honorable spirit of this old warrior.

We believe in being faithful to a trust. We believe in being honorable in our dealings. We do a high-charactered work at a reasonable price.

### NOW THE LUMINOUS COLLAR

Genius Has Invented Coat With Phosphorescent Cross, to Be Worn in London's Darkened Streets.

By the time the war has lasted for 33 years, only the very patient Londoners will consent, whatever views the police and old Count Zeppelin may hold on the matter, to go on colliding with one another and breaking leg after leg and all the available collar bones.

We shall all want to light up, like bicycles, and to follow the example of two illuminated young ladies who have an eye to the times in which we live.

They were wearing a new line in drop fittings—luminous collars. Most of us are, in this period, as invisible as an Ethiopian minstrel wearing mourning in a coal yard on a foggy night. The city genius has invented a collar for women, the type in which glows a brilliant purple, and the blacker the atmosphere the stronger the light.

It is a wonderful spectacle. When a representative arrived at the city office, the director, who has applied for a patent for his collar and deserves it—pulled down the blinds, and the two lady clerks had apparently vanished in the Maskelyne manner, only for crossed bars of phosphorescent purple which were the parts of their collars that had been treated scientifically.

Even the laundryman, the inventor claims, cannot remove the glow-worm effect.

Certainly it would save me from collision with passers-by. Of course a certain amount of risk still remains, for a lamp post, a conservative creature, will not step out of the way of a collar.

Meanwhile, what about luminous hats for men and luminous boots? Can nothing be done in luminous curb-stones?

It is obvious, however, that these things will come and a man will be able to hire himself out for the homeward journey with such luminous devices on his clothes as this:

Wear Spinks' Phosphor Halos and Luminous Blacking.

There seems not the slightest doubt that the luminous collar is practical and will be seen all over London.

But what effect will be produced on the mind of a man going home from an earnest evening at the club when he meets luminous collar girls with rubber-heeled boots walking rapidly toward him—well.—London News.

### LET BEST FRIENDS BE BOOKS

Much Comfort Found in Them for the Lonely and One in the Evening of Life.

In passing days of our lives, when the fires of passion have been well burned out; when we have come face to face with the vicissitudes of life and find out that we have either won or lost the battle, let our best friends be books, observes a writer in the Memphis Commercial-Appel.

We can commune with them so long as we please, and when we are tired, we can shut them up. This is more than we can do with our friends of the human family.

When a man comes home at night harassed and backed with the worries of life, he wants not only rest for the body; he wants rest for his soul, for his heart, for his mind.

The wife who hopes to develop in the home a perfect atmosphere of content, will study her husband's moods. When he is worried; when his mind is a bit distraught and he desires mental rest, he will read. There is a wonderful amount of consolation in our books. Sometimes he may yield to light literature. At other times he will place his thoughts on more sincere and heavy topics.

Our books are our real friends. It does not make a bit of difference how sick a man may be, if he will have read to him a chapter or two of "Pickwick Papers," he will smile. Read your little one just a page or two of "Little Men" or of "Little Women" and see the rest that will spread over his face, that beautiful expression of soothed pain. Let anyone who is in trouble, and who has no friend, gather himself in solitude with a good book. There is much consolation in it. It has that unexplainable source of relief. It is like the tender touch of a woman's hand on a parched and fevered brow. It rests the mind, it brings for the time being at least surcease to sorrow.

### Light Cures Disease.

When rays of light fall upon the skin of our bodies, which is translucent, the greater part of them are arrested, some by one layer of the skin, some by another, and still others are not stopped until they have penetrated the subcutaneous tissues. This arrest of the light rays produces radiant heat, which has a higher penetrating power than convection heat as generated by a hot water bag or poultice, for instance. Prof. E. C. Titus of England, in an address has stated that such heat penetrates two inches or more, while convection heat is excited principally on the surface. This is why electric light baths and sun baths are so stimulating to the organs of elimination.

### Warranted Nonshrinkable.

A workman came home in triumph one evening with a red flannel shirt, which he had bought at a bargain, and moreover, it was guaranteed not to shrink. In due course the shirt was sent and returned from the wash, and the following morning the workman put it on. Just as he had done so his wife entered the room. "Uilo, 'Arry," she exclaimed, "where did you get that new tie?"

## DISPERSION SALE OF Registered Jersey Cattle

TO BE HELD AT

Elk Valley Stock Farm in Suburbs of Elkton, Kentucky,

**Saturday, June 16, 1917,**

At 1:30 O'clock, P. M.

I have sold an interest in my farm and formed a partnership to operate same to become effective Aug. 1, therefore on the above date I will sell at public outcry my entire herd of Registered Jerseys. This offering consists of my Imp. Herd Bull and forty-five head of Milch Cows and Heifers.

This is one of the largest and best herds in Southern Kentucky, embracing the breeding of Golden Fern's Noble H. C. 4570, Fairy Glen's Raleigh 79433, Tormentor, 3533, Golden Jolly and St. Lambert.

I call the attention of the Boys and Girls to my heifers and that I will take their notes on twelve months' time with personal security for their purchases.

Sale will be made on twelve months time for bankable note, or 2 per cent. discount for cash. Write for sale sheet.

**W. G. DAVIS, PROP.**  
**COL. GILL S. MOORE, Auctioneer.**

## Waste No Food

### Food Waste of About 700 Million Dollars.

"For partial immediate relief, every individual and community should consider earnestly the matter of food conservation and the limitation of waste. As a Nation we seem to have a disdain of economizing. In many homes there is a strong feeling that it is 'only decent' to provide more than will be eaten and that it is demeaning to reckon closely. The experts of the Department of Agriculture report to me that the dietary studies made by them point to an annual food waste of about \$700,000,000. Of course, the waste in families of very limited means is slight, but in the families of moderate and ample means the waste is considerable. Even if the estimate were reduced by half, the waste would still be enormous.

"The food waste in the household, the experts assert, results in large measure from bad preparation and bad cooking, from improper care and handling, and, in well-to-do families, from serving an undue number of courses and an over-abundant supply and failing to save and utilize the food not consumed. As an instance of improper handling, it is discovered that in the preparation of potatoes 20 per cent of the edible portion in many cases is discarded."—SECRETARY OF AGRICULTURE, March 3, 1917.

### Food is Wasted

(a) When we eat more food than our bodies need for growth and repair and to supply energy for our work. Overeating tends to poor health and fat instead of brawn, makes us sluggish and indolent instead of energetic and resourceful. Eat enough and no more. Eat for physical and mental efficiency.

(b) When food is burned or spoiled in cooking. Improperly prepared or poorly seasoned food will be left on the table and probably wasted. Buy food wisely and then prepare it carefully.

(c) When too much food is prepared for a meal. Unserved portions are apt to be thrown into the garbage pail or allowed to spoil. Many housekeepers do not

know how to use left-over foods to make appetizing dishes.

(d) When too much food is served at a meal. Uneaten portions are left on the plate and later thrown into the garbage pail. Learn to know the needs of your family, and serve each no more than you think he will want.

(e) When anything edible is allowed to go to the garbage pail or allowed to spoil for lack of proper handling.

(f) When food is handled carelessly. Buy clean food, keep it clean until used, be neat in all details of cooking and serving. This lessens waste and is a valuable health measure as well.

### Feed Your Own Family First

Don't feed high-priced human food to hogs or chickens.

Don't send valuable food to the incinerator or the fertilizer heap.

Don't pour into the sewer nourishing food in the shape of milk, skim milk, sweet or sour soup, gravy, or melted fat, or water in which cereals or vegetables have been cooked.

Keep good food out of your garbage pail and kitchen sink.

## DEMONSTRATE THRIFT IN YOUR HOME

Make Saving, Rather Than Spending Your Social Standard.

### The Difference.

A genius can no more help being a genius than a crazy man can help being crazy. It just happens that when a genius does what he considers a smart thing, it is smart; but when the poor crazy man does his best it turns out to be foolish.—Ed Howe's Monthly.

### Force of Habit.

According to a western clergyman, dining has become a lost art. It still remains, however, a more or less necessary function, although its fearful cost may have reduced it from an art to a merely perfunctory process.—Providence Journal.

### Growth of Mahogany.

The rate of growth of mahogany is shown in southern Nigeria, where the site of a town destroyed 60 years ago has been covered with a forest containing mahogany trees, some of which were found to be more than ten feet in diameter.
